

Construction Safety Seminar

New ANSI standard for mobile elevated work platforms

Free online discussion • 7 to 9 a.m. • Jan. 18, 2022

About this Construction Seminar

How does the new ANSI A92 mobile elevated work platform (MEWP) standard affect you? Attend this Construction Seminar to learn what the ANSI A92 Consensus Standard is and how it applies to employers and Minnesota OSHA.

The presentation will cover updates to the standard, which include:

- new design changes and classifications;
- safe use of MEWP; and
- training requirements.

Tool-tray use will also be a part of this discussion. The nationally recognized general contractor presenting the information will simplify MEWP classification terminology and discuss who is responsible for the safe use of and operator training for these high-use machines.

The Construction Seminar series is a great opportunity to get answers directly from Minnesota OSHA Compliance. The seminars are designed to help those who work in the construction industry to re-energize their company's safety and health practices. Attendees have the opportunity to ask questions and offer input during the discussion.

Presenter

- **Ben Watson**, senior safety engineer, Mortenson Construction

An online presentation

- Join by computing device at <https://minnesota.webex.com/minnesota/onstage/g.php?MTID=e6f5bb4fbe1fbba936d0bcecbc5f4b086>.
